

Sessions organized at IAGA General Assemblies

IUGG 2011, Melbourne, Australia:

- Geomagnetic networks, computation and definition of products for space weather and space climate

IAGA 2009, Sopron, Hungary:

- - Connecting space and ground-based magnetic data for scientific benefit
 - Application, history and evolution of geomagnetic indices

IUGG 2007, Perugia, Italy:

- - Use of geomagnetic data and indices in space weather and space climatology
 - Geomagnetic measurements in remote regions

IAGA 2005, Toulouse, France:

- - Indices and algorithms for detecting geomagnetic and space weather events
 - Geomagnetism and geospace climatology

IUGG 2003, Sapporo, Japan:

- - Geomagnetic indices: real-time prediction and forecasting
 - The geospace environment in real-time: science and technology

IAGA 2001, Hanoi, Vietnam:

- - Derivation, interpretation and use of geomagnetic indices
 - Practical applications for monitoring and predictions of geomagnetic activity
