United States Department of Commerce, National Oceanic and Atmospheric Administration
National Environmental Satellite, Data, and Information Service

National Geophysical Data Center (NGDC)

These images are digitally-rectified orthophoto mosaics constructed from National Ocean Service aerial photography taken at altitudes of ~ 24,000 ft. (1:48K scale). The mosaics were assembled at NGDC, as part of a joint project with the National Ocean Service's Center for Coastal Monitoring and Assessment (CCMA) of mapping coral reefs in the U.S. Caribbean possessions (U.S. Virgin Islands and Puerto Rico) during 1999-2001.
