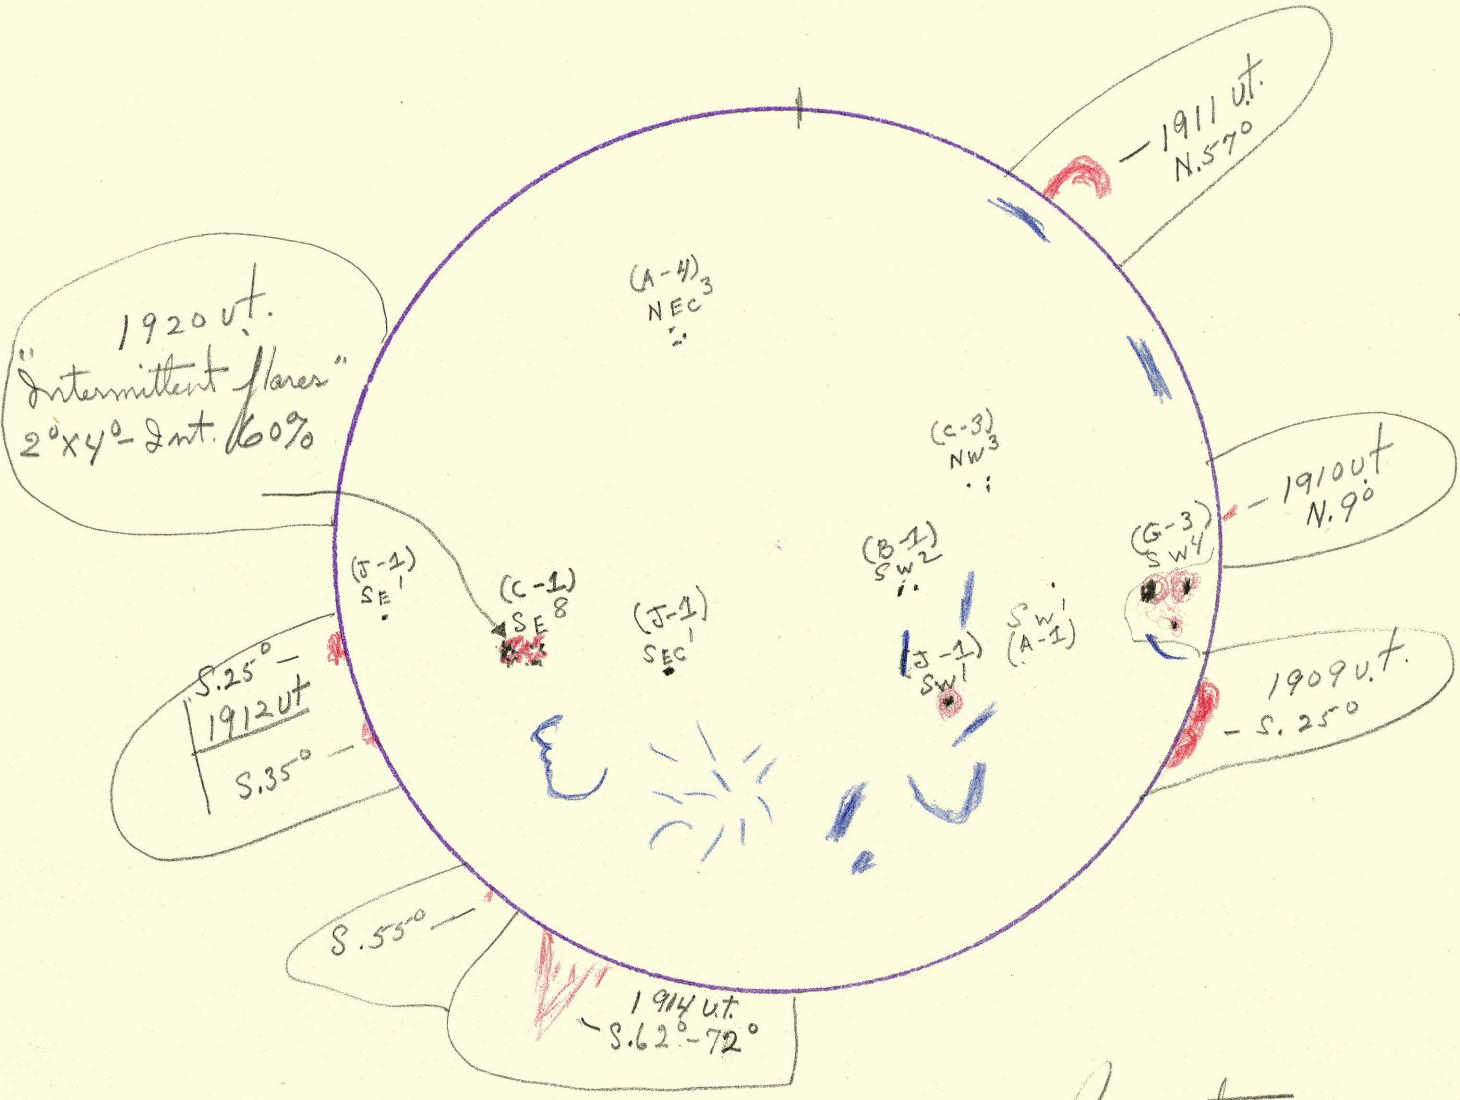
Day Solar Report: NORTHWESTERN OBSERVATORY Spokane, Washington



Date: 27 October, 1958. Observer: - Parmenter

Times: 1900 — 1907 — 1908 — 1923 ut. - Photos - 1925 - 1930 ut.
(projection) (Spectroheliscope)

Sky Condition: clear — Fall "haze" — clouds coming in at obs. end.

Solar Limb: only fair -

Apparatus Used: projection — Spectroheliscope (Ha) — photos - (Ha) -

Remarks: other surface phenomena may have been apparent, but "rushed" observing along, to finish before clouds came in. Photos of "weak" nature, due to lack of intensity from haze.
