HIGH ALTITUDE OBSERVATORY
OF THE
UNIVERSITY OF COLORADO
BOULDER, COLORADO

1 Aug '59

Dear Mr Parmenter,

Hearty congratulations on the excellent solar observations you made ~~on~~ during mid-July! The prints & film strip you sent us were most intriguing.

It turned out that this was an exceptional (!) solar region and of particular interest because of the U. of Minn.'s balloon observations. Enclosed is a copy of a special summary made by Miss Trotter of its various aspects.

With best wishes,

Ruth and Hansen
