

NOS 15524-108

Bathymetry compiled from NOS SEAMAP survey 1951 to 1970 supplemented by survey data from other sources.

Bathymetric contour interval, 100 meters. Seismic depth information corrected for refraction.

NOTE: Lack of sufficient data on portions of the map requires the use of general lead lines to show probable shape to contour or elliptical-shaped features that would otherwise appear truncated. The form lines are set at the prescribed contour interval.
