BATHYMETRIC MAP

GULF OF MEXICO
MISSISSIPPI SLOPE

Best bathymetric information available was obtained by the Research Ocean Service (ROS) bathymetry and sounding from 1925 and 1926 under the name of the United States Hydrographic Office. This information is not intended for navigation purposes. For navigation purposes, consult the current charts.

Other information on the bathymetry was obtained by the Research Management Service, which uses a bathymetric system of the United States Coast and Geodetic Survey. The information on this map is not for Federal training purposes. For such purposes, refer to the SIO Office of Training, Station 7350, for the current information.
