"Plotter"

Spectroheliograph - (Ha)

graph, visually - (Ha)

Sky Condition: clear, but "breeze-gusts".

Solar Limb: fairly good, only.

Apparatus Used: 7" Image "Plotter" — 10" aperture Spectroheliograph — (Ha) graph, visually (Ha)

Remarks: Polar-Region Spicules still quite strongly shown, today, but conditions too "rough" to "work" them, much. Greater heights base-widths noted, however.
