

(SP) (1)

(faint)
"R.N. Plume"

18:20 UT - N.3° -

(SP) (2)

Date: 24 September, 1964.

Observer: Parmenter

Times: 18:10 UT. ————— 18:15 UT. —————
"Plotter" —————18:17 UT. ————— 18:45 UT.
Spectroheliograph - graph - Vector - (Ha)

Sky Condition: clear, some " haze".

Solar Limb: only fair.

Apparatus Used: 7" Image "Plotter" ————— 10" Spectroheliograph - graph - Vector - (Ha)

Remarks:

(1) North Polar Region Spicules "tiny" to "average", (2" x 5" - 10"). now and again a taller, thin, feature. (2" x 15")

(2) South Polar Region Spicules "average", (2" x 10") with "paired" taller features. (2" x 15") in fairly regular "groupings".

some atoms "obscuration and "scatter-broadening" allowed for.
