NORTHWESTERN OBSERVATORY

Spokane, Washington

FEB 21 1967

Date: 11 February, 1967.

Observer: Parmenter

Times: 21:38 u.t. — 21:50 u.t. — "Plotter" only.

Sky Condition: Large opening (Partially clear) (High winds)

Solar Limb: fair only (much continual P.M. turbidity)

Apparatus Used: 7" Image "Plotter" — No H α observations

Remarks:

Very great obscurity due to P.M. turbidity and wind "jump," making count and classification difficult.
